

Shivam Narayan

Bangalore | [+91-8292420948](tel:+91-8292420948) | sshivam6495@gmail.com | [GitHub](#) | [HackerRank](#)

Career Objective

Immediate Joiner with 1-year apprenticeship in scalable web app development. Skilled in Python (Django, Flask, FastAPI), JavaScript/TypeScript, and React.js (Redux, Hooks), with proficiency in HTML5, CSS3, and RESTful APIs. Strong in SQL, Git, Docker, AWS, and CI/CD. Knowledge of OOP, data structures, and algorithms. Familiar with Agile, JIRA, and modern SDLC. Experienced in AI (LangChain, Hugging Face, RAG) and microservices with Kafka, TDD, and performance optimization. Adaptable, collaborative, detail-oriented, accountable for delivery.

Technical Skills

- **Languages & Scripting:** Python (Advanced), SQL
- **Frontend:** HTML5, CSS3, JavaScript, TypeScript.
- **Frameworks:** Django, Flask, FastAPI, React
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Version Control & Tools:** AWS, Git, Swagger, OpenAPI, Docker, Postman, Webpack, Microservices
- **AI & LLMs:** RAG, LangChain, HuggingFace, Fine-tuning LLMs, VectorDB
- **Methodologies:** Agile (Scrum), SDLC

Professional Experience

Software Engineer Apprentice

Ascendum Solutions Pvt. Ltd, Bangalore | Oct 2024 – Present

- Worked on **customer enterprise solution** with web & android support for onboarding and secure role-based workflows.
- Built **scalable React.js frontends** using **TailwindCSS**, **Material UI (MUI)**, and **ShadCN** for **modern, reusable, and responsive UI components**.
- Integrated **REST API** via **Axios** for **real-time data synchronization** and **enhanced application performance**.
- Implemented **state management** using **Redux Toolkit** and **Context API**, improving maintainability and scalability.
- Optimized build performance using **Vite/Webpack**, reducing **initial load time by 25%**.
- Collaborated in **Agile sprints** with **cross-functional teams**, ensuring seamless **feature integration**, **code reviews**, and **timely project delivery**.
- Utilized **Git version control** (branching, pull requests, and reviews) to maintain clean and collaborative workflows.
- Tech Stack: React Native, TailwindCSS, MUI, ShadCN, Redux Toolkit, Axios, Vite, Webpack, Javascript, REST API

AI RAG Chatbot (Proof of Concept)

- Designed and deployed a **multi-modal AI chatbot** capable of understanding and interacting with **documents (PDFs)**, **spreadsheets (Excel/CSV)**, and **images** through a unified conversational interface.
- Developed a **React.js frontend** for interactive user chat and integrated a **Django backend** for data orchestration, model inference, and database connectivity.
- Built a **REST API using Django and PostgreSQL** to store data from learning management systems.
- Developed a **full-stack web application** with Django serving a REST API and React as the frontend.
- Implemented **GitHub OAuth** to fetch data from users' repositories.
- Designed and implemented a **Retrieval-Augmented Generation (RAG) pipeline** using **LangChain** and **Hugging Face Transformers** (LLaMA, TAPAS, Donut, T5) for context-aware document and table-based Q&A.
- Integrated **ChromaDB** as a vector store for semantic search and context retrieval, improving response relevance and accuracy.
- Enhanced chatbot reasoning with **custom embeddings**, **prompt optimization**, and **top-k ranking** based on semantic similarity metrics.

- **Optimized retrieval latency by 30%** and improved accuracy through **fine-tuning lightweight models using Ollama** for faster inference and lower compute costs.
- Supported **database querying and natural language chat**, enabling interaction with both structured (SQL/Excel) and unstructured (PDF/text) data.
- **Tech Stack:** RAG, React.js, Django, Python, LangChain, Hugging Face Transformers, ChromaDB/VectorDB, Ollama, PostgreSQL, SQL, REST APIs, Docker, GitHub OAuth.

Projects

Uncovering Income Tax Fraud Detection – NASSCOM Top 50 | [GitHub](#)

Final Year Project | Team Size: 3 | Research Paper Published

- Developed a **Machine Learning–based Fraud Detection System** using **Logistic Regression** and **Scikit-learn** in **Python**.
- Trained the model on a **dataset of 50K records** to identify income tax fraud patterns and anomalies.
- Deployed the model as a **real-time Android app** using **TensorFlow Lite** for **on-device inference** and improved mobile performance.
- Achieved **high detection accuracy**, efficient **model optimization**, and **lightweight deployment** suitable for edge devices.
- **Tech Stack:** Python, Scikit-learn, TensorFlow Lite, Java, Android Studio, AI/ML

Certifications

- 5 Star Python & SQL – HackerRank
- Frontend Development (HTML, CSS, JS) – freeCodeCamp
- Python Full Stack Development – JSpiders, Bengaluru
- Top 50 SQL Problem Solver – LeetCode

Education

B.Tech in Information Science Engineering (Specilization in AI/ML) Presidency University, Bengaluru, karnataka	2019 – 2023
Senior Secondary (12th grade) Mahabodhi College, Gaya, Bihar	2017 – 2019
Matriculation (Science) D.A.V. Public School cantt area Gaya, Bihar	Until 2017

Declaration

I, Shivam Narayan, hereby declare that the information provided is true to the best of my knowledge.
Date: 24 Oct, 2025

Place: Bengaluru, Karnataka
